( ) ⟹ **{ Software Developer, Graphic Artist, Problem Solver, Coach, High-Fiver }**

< About />

Enthusiastic team player, effective communicator, and creative thinker with a growing skillset in full-stack software development. I high-five often. Eager to learn as well as teach and motivate others. Not afraid to ask questions and go the extra mile to get the job done right.

Currently a Junior Instructor at Nashville Software School teaching Javascript / React on the client side and C# / ASP.Net Core as well as Python / Django on the server side. Advanced CSS skills.

Bachelor's Degree in Art and Design. Proficient with Adobe software suite including XD, UI/UX prototyping. Skilled painter with an eye for detail. Mediocre guitarist with a desire to shred.

Prior experience as a graphic artist and web designer, including nearly two years of international work.

Worked extensively as a stenographer, covering primarily civil litigation. Excellent communication skills. Managed tight deadlines and worked closely with attorneys in highly-confidential settings.

Just as comfortable in a suit and tie as I am in jeans and a rock t-shirt.

Transitioned out of the legal field to return to web development. I love solving problems with code and collaborating with others to achieve a common goal.

< Education />

Nashville Software School
Full-Stack Web Development
Six-Month, Full-Time Bootcamp

New York Career Institute
AOS - Court Reporting

North Carolina State University
College of Design
Bachelor of Arts - Art and Design

< Coding Experience />

Full-Stack Software Developer
Nashville Software School | *Oct 2018 – Mar 2018*

Full-time software development bootcamp focusing on full-stack web development fundamentals and problem solving, with final half of program executed in a simulated company environment with Scrum methodology.

- Built single-page client-side apps using React, HTML, CSS, and JavaScript
- Developed server-side applications using Python, Django, and SQL
- Applied OOP fundamentals through group and individual projects reflecting real-world business problems
- Utilized source code version control with Git/GitHub
- Learned and applied JavaScript fundamentals leveraging DRY, modular, readable code and reusable components
- Implemented task automation with Grunt, linting with ESLint, and module bundling with Browserify
- Designed and wireframed applications using Adobe XD
- Planned applications by white boarding dependencies and building ERDs

< Projects />

MCA - Concert Tracking App - *Server-Side Capstone*

As a music lover and frequent concert-goer, I wanted an app where I could keep track of the concerts I've attended, view the setlists, add a rating, and store any photos or videos I took of the event all in one convenient place.

MCA is a responsive app that allows the user to search for concerts based on artist or venue, select the events they've attended and then add them to their list. Once added, the user can add their own rating, photos, and videos if they so desire.

MCA was written in **Python with Django** and utilizes the **Setlist.fm API**.
Github Repo: https://github.com/BryanNilsen/MCA-MyConcertApp

SwishList - Basketball Shot-Tracking App - *Client-Side Capstone*

An avid basketball player, I wanted an app to log shots from various court locations in order to track my accuracy, enabling me to focus on areas that needed improvement. Additionally, as a basketball coach, I felt this app would aid young players as well. By adding a leaderboard and leveling-up features, I believed the competitive element would encourage players to take more shots with the goal of improving their accuracy.

Swishlist is a responsive single-page basketball shot-tracking app that accomplishes the above needs and more. Players can log their workouts and shots using a dynamically-generated basketball court map built using custom CSS. Individual statistics are calculated and presented with leaderboards in addition to the user's profile and motivational quotes for added inspiration.

Technologies: **React, JSON Server, Custom CSS**
